

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph at page 6, lines 4-10, with the following paragraph:

Many types of food products can be utilized with baking tray 10 including corn dogs, egg rolls, breaded fish fillets, breaded chicken chunks, and breaded jumbo shrimp. The only requirement is that a stick or skewer be inserted into the food product. Preferably, the stick or skewer is wood, because wood is a very inefficient conductor of ~~or~~ heat. The food product will not be heated from the stick. Baking tray 10 does not reheat the food—it restores the food to its original state.

Please replace the paragraph at page 6, lines 21-24, with the following paragraph:

Figure 2 shows one of sloped sides 18 in more detail. Figure 2 includes baking tray 10 with sloped side 18 and apertures 20. In operation, the open end of a stick that has been inserted into a food product is inserted through aperture 20. At least one aperture 20 is present on sloped side 18. In Figure 2, examples of apertures with oval, diamond, and vertically oriented rectangular shapes are shown.

Please replace the paragraph at page 6, lines 25-26, with the following paragraph:

Figure 3 shows the front of baking tray 10 having the sticks of corn dogs C inserted through apertures 20. In Figure 3, an example of a horizontally oriented rectangular aperture is shown.
